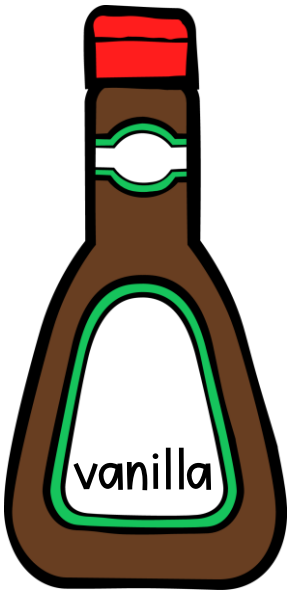
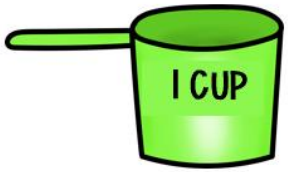
VANILLA

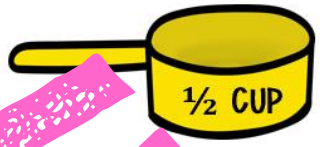
The average person uses about twelve thousand gallons of water each year. In the United States, 2.30 billion drink containers are sold each year, but two-thirds end up in a landfill or littered. It can take up to 700 years for just one plastic bottle to break down in a process called biodegrading. Drink containers can be recycled! Recycling is when new items are created from old and used materials.



What amount of drink containers end up in landfills or littered?



One-half



Three-fourths

One-fourth

Two-thirds

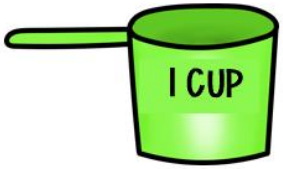
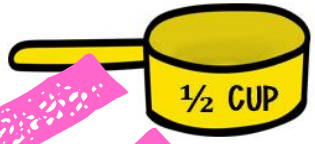
BROWN SUGAR

Aluminum cans are the most recycled item. Aluminum cans can be recycled and put back on the shelf in just two months. Over 100 billion pieces of junk mail are delivered each year in the United States. Less than 50% of printing paper is recycled. If everyone recycled their newspapers, 41,000 trees would be spared in the United States alone.

How long does it take for an aluminum can to be recycled and put back on the shelf?



3 weeks



2 months

4 months

5 weeks

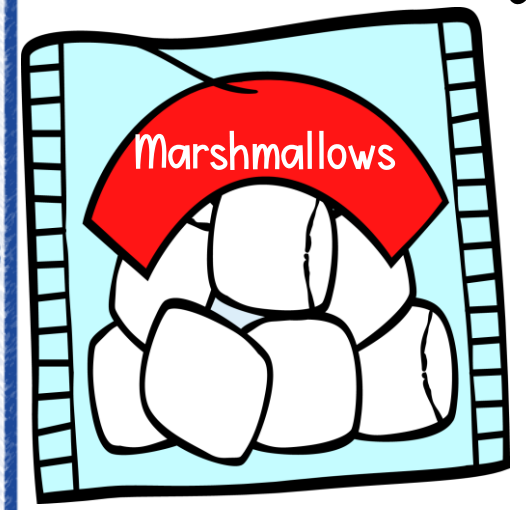
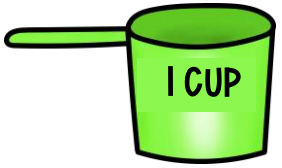
MARSHMALLOW

In the United States, one billion trees worth of paper is thrown away every year. Four million pounds of plastic are dumped into the oceans every year harming or killing sea animals. Glass can be recycled over and over again. A glass bottle can take over 4,000 years to decompose. Landfills are one of the biggest contributors of soil pollution.

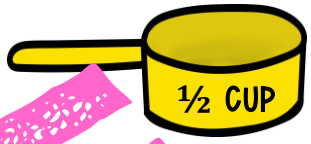


Statistics show that the United States throws away $11.4 billion worth of recyclable containers every year.

How many pounds of plastic are dumped into the oceans every year?



2 million



4 million

4,000

1 million

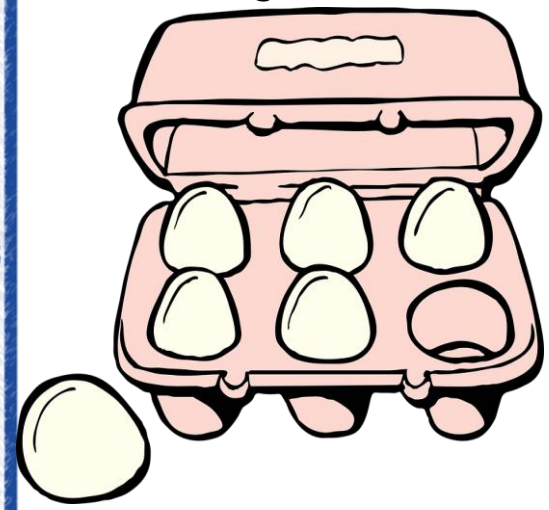
EGGS

Recycling just one glass bottle can save enough energy to power a light bulb for four hours. Recycling just two aluminum cans saves the same amount of energy it takes to power a computer for one day. The recycling rate in the United States is only about 34.5%. If we don't improve the recycling rate, the rainforests could be cut down at 100 acres a minute. What are you doing to save the planet?



Recycling just one glass bottle can save enough energy to power a light bulb for _____ hours.
