WATER CYCLE

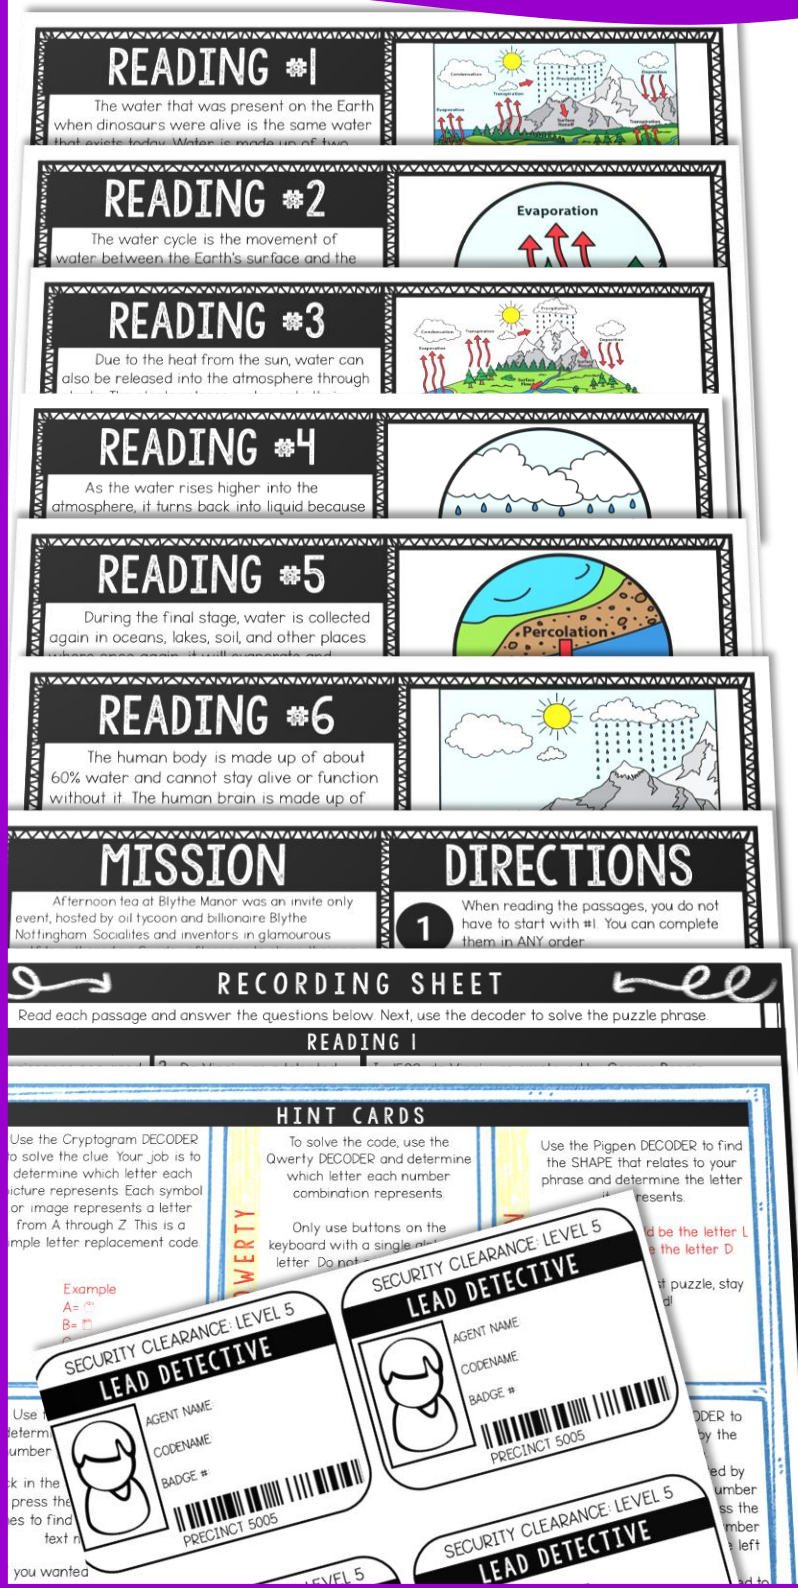

READING ESCAPE

6 PASSAGES

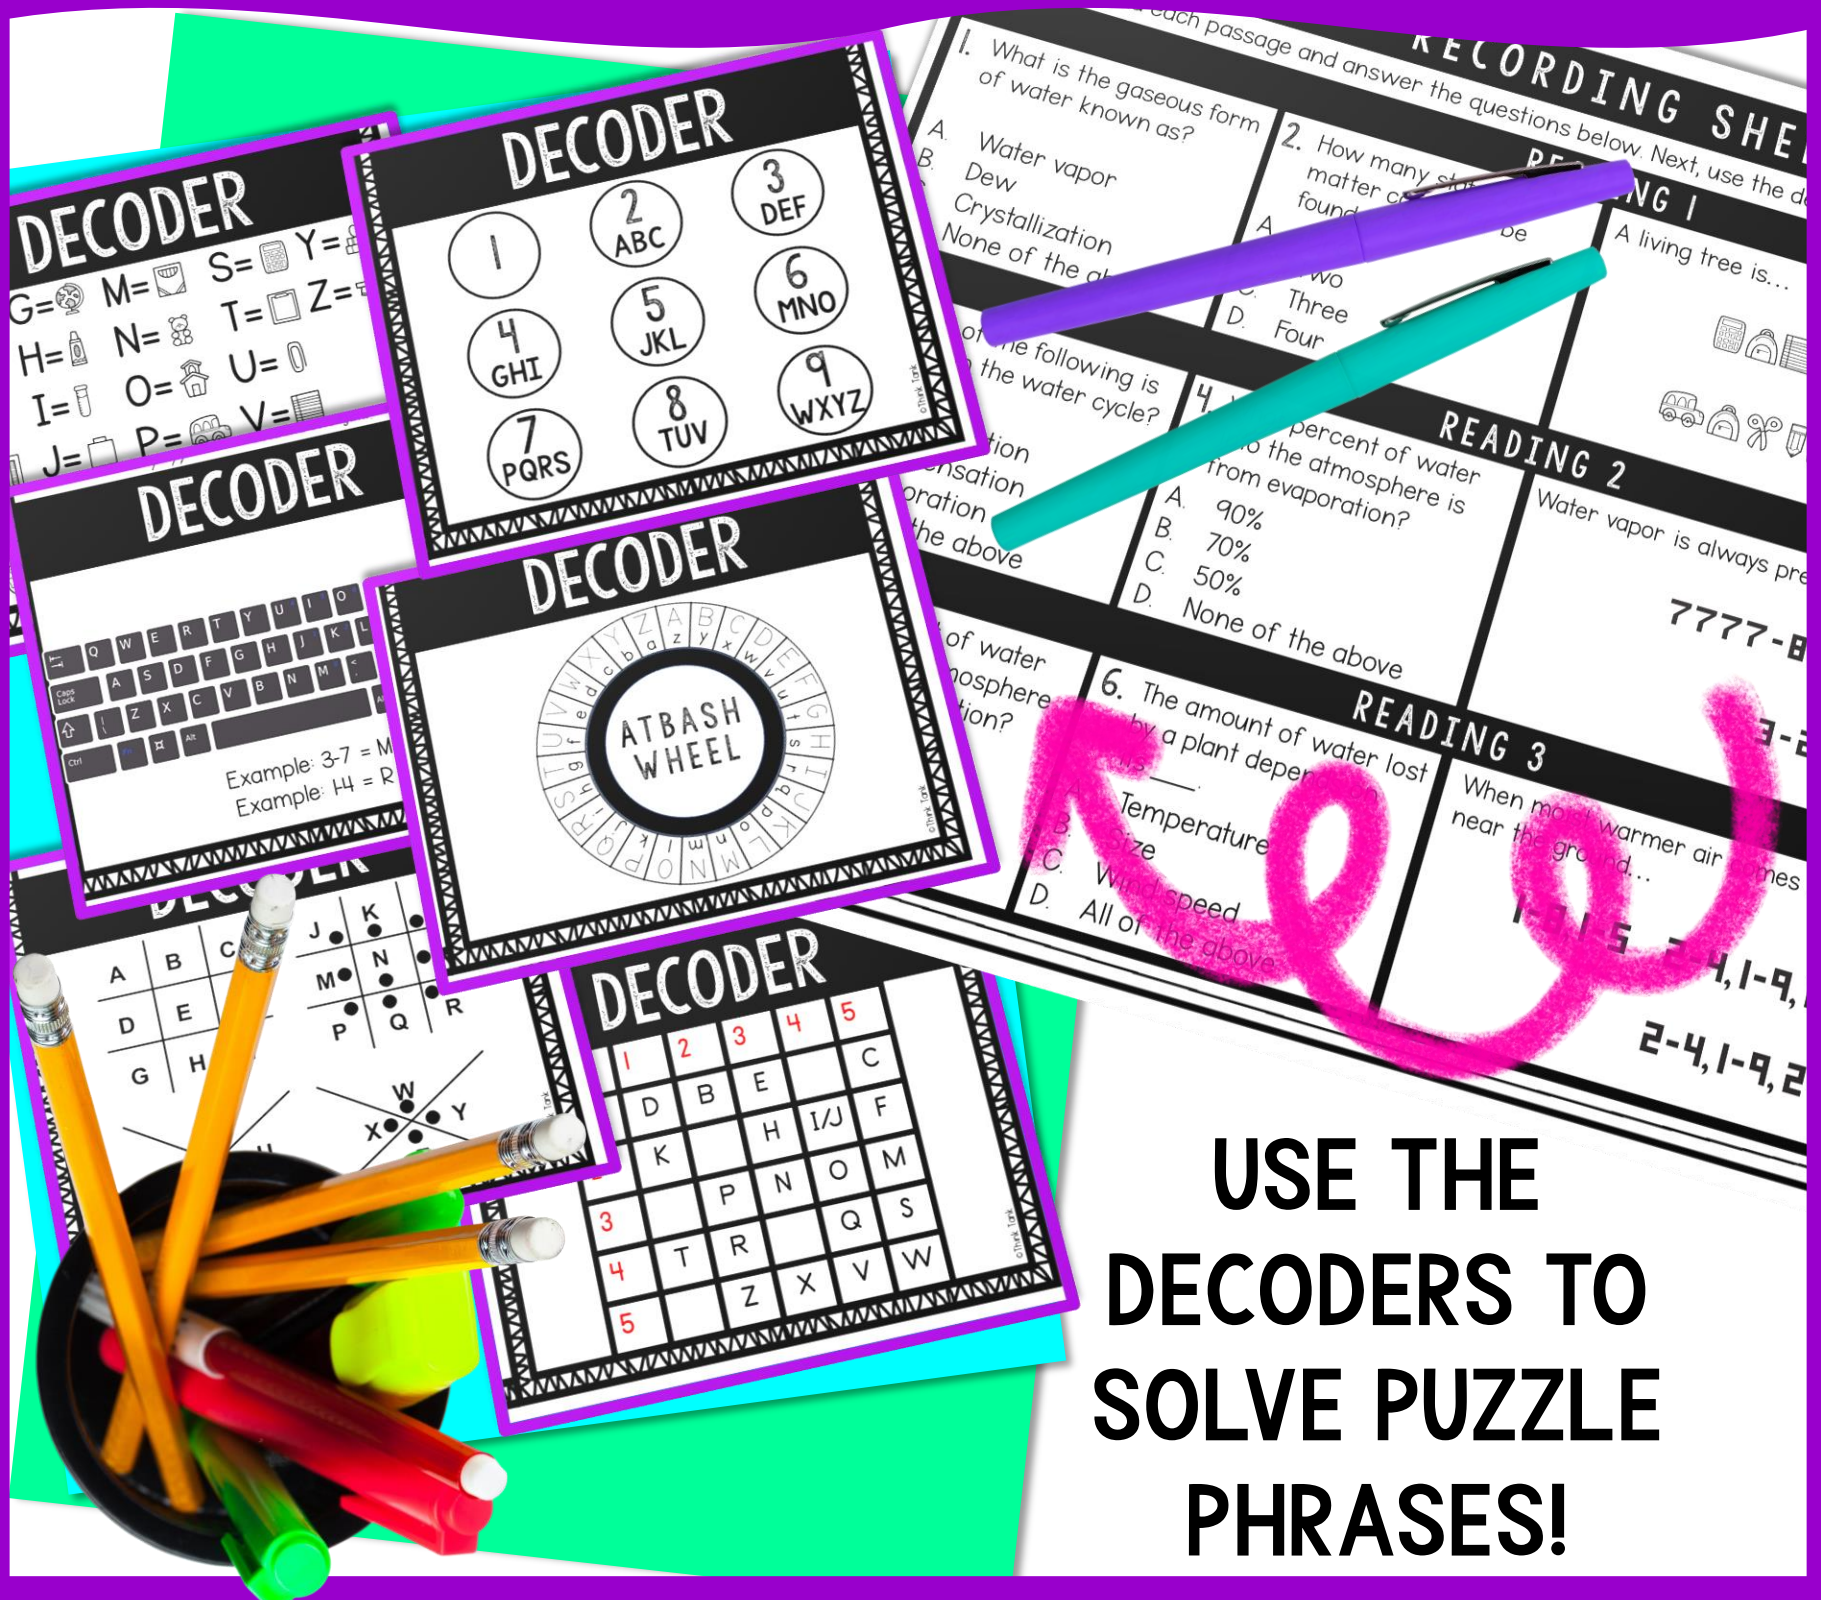

READING #3
Due to the heat from the sun, water can also be released into the atmosphere through plants. The plants release water onto their leaves which then evaporates into vapor. This is known as transpiration. The amount of water lost by a plant depends on its size, temperature, humidity, and wind speed. The combination of both evaporation and transpiration is known as evapotranspiration. Around 10% of the water vapor in the atmosphere comes from transpiration.
DECODER
READING #6
The human body is made up of about 60% water and cannot stay alive or function without it. The human brain is made up of 75% water. Humans and animals need
READING #5
During the final stage, water is collected again in oceans, lakes, soil, and other places where once again, it will evaporate and repeat the cycle. Water may flow across the ground and collect in the oceans, rivers or lakes. This water is called 'surface run-off.'
When the water gets absorbed into the Earth it is called 'groundwater.' Groundwater is used by plants and animals for drinking.
On average, the water cycle takes about nine days to evaporate, condensate, and precipitate.

DECODER

WHAT'S INCLUDED?

- [x] 6 Half page passages
- [x] 6 Puzzle decoders
- [x] 12 Multiple choice Q's
- [x] Teacher guide
- [x] Answer key
- [x] Student directions
- [x] Hint cards

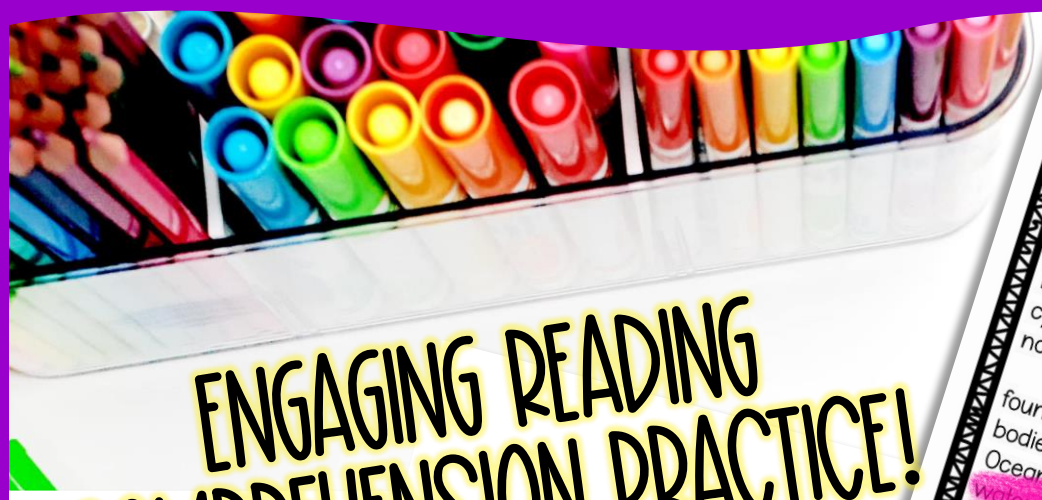

PUZZLE TYPES

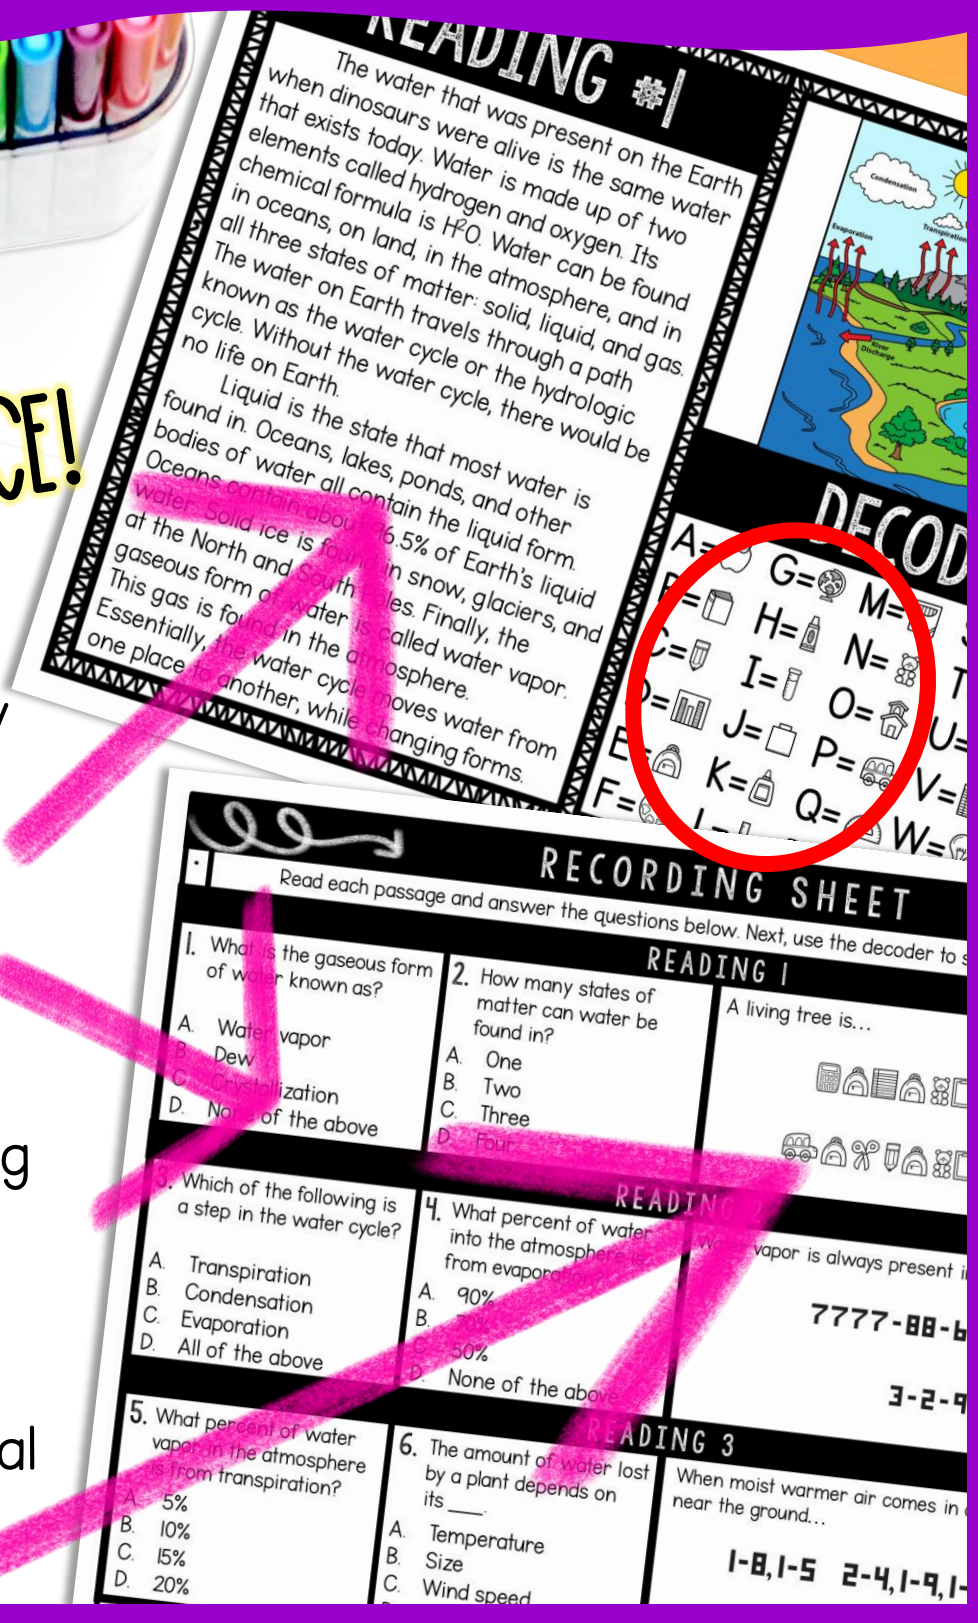

NO PREP!

HOW IT WORKS

ENGAGING READING COMPREHENSION PRACTICE!

1. Students work individually (or in pairs) and visit SIX reading stations.

2. Students will answer the questions related to that passage on their recording sheet.

3. Students will use that specific "decoder" to reveal a "clue" about the topic.

BENEFITS & USE

THINK OUTSIDE THE BOX!

- ANTICIPATORY SETS
- UNIT REVIEW
- EARLY FINISHERS
- STATIONS
- SUB PLANS
- PARTNER WORK
- ENRICHMENT
- NO PREP
- PRINT AND GO
- CROSS-CURRICULAR
- HIGHLY ENGAGING
