PLANET URANUS

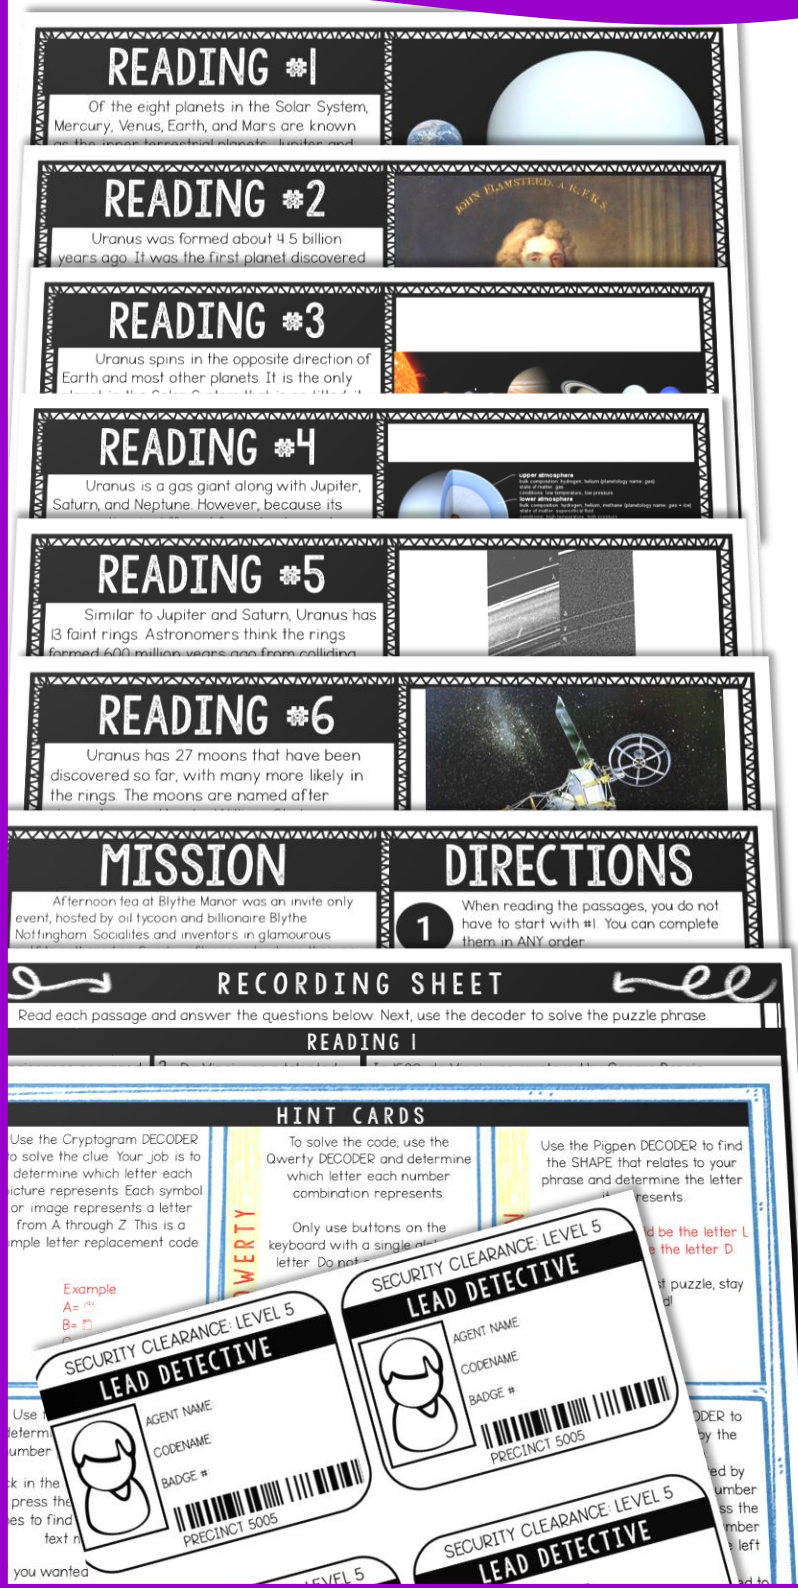

READING ESCAPE

6 PASSAGES

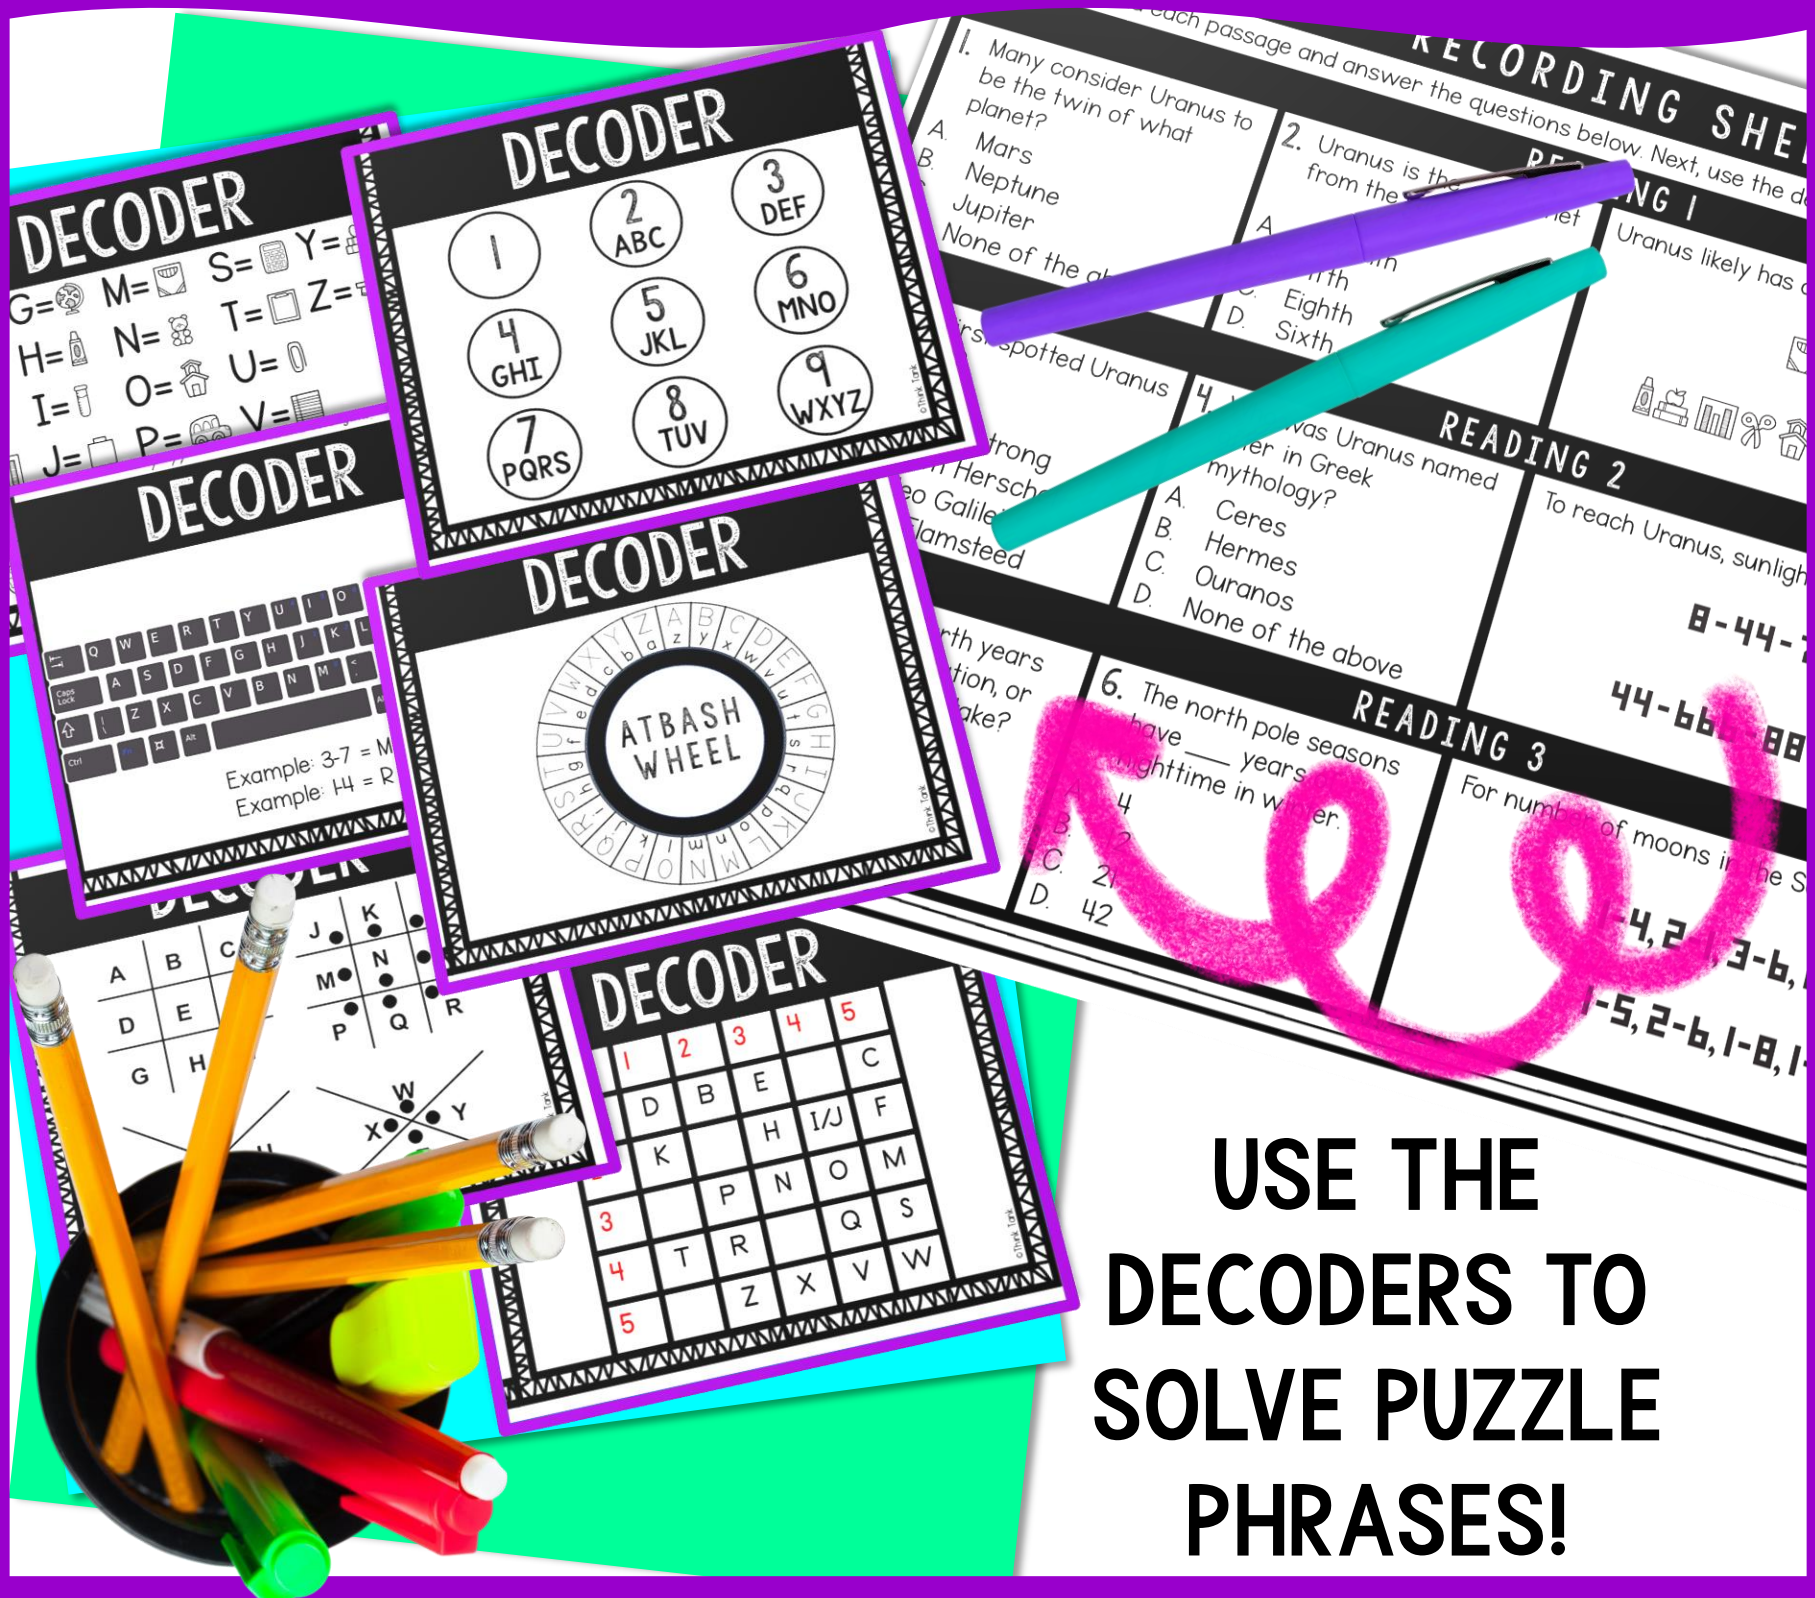

READING #3
Uranus spins in the opposite direction of Earth and most other planets. It is the only planet in the Solar System that is so tilted, it spins on its side. The extreme tilt of the planet has the sun hitting parts of it for over 40 years and keeping other parts of the planet in the dark, without heat. Temperatures can dip to -224 degrees Fahrenheit.
Uranus spins faster than Earth and one rotation, or day, only takes 17 Earth hours. It takes the planet a long time to travel around
DECODER
READING #6
Uranus has 27 moons that have been discovered so far, with many more likely in the rings. The moons are named after characters written by William Shakespeare and Alexander Pope.
READING #5
Similar to Jupiter and Saturn, Uranus has 13 faint rings. Astronomers think the rings formed 600 million years ago from colliding moons and other celestial objects. They are categorized as inner and outer rings. The inner rings are dark and narrow and much harder to see, while the outer rings are more brightly colored. The rings were first discovered in 1977 by James Elliot, Edward Dunham, and Jessica

WHAT'S INCLUDED?

- [x] 6 Half page passages
- [x] 6 Puzzle decoders
- [x] 12 Multiple choice Q's
- [x] Teacher guide
- [x] Answer key
- [x] Student directions
- [x] Hint cards

PUZZLE TYPES

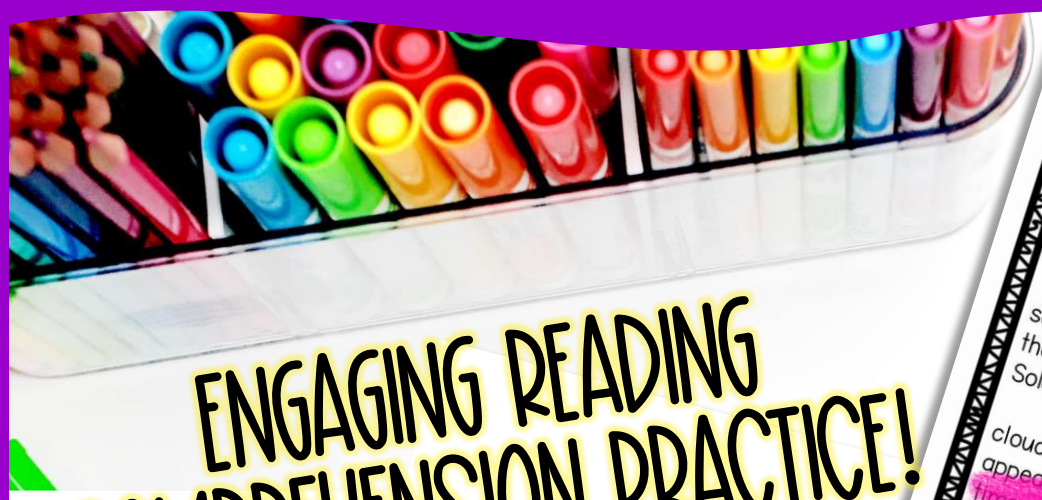

USE THE DECODERS TO SOLVE PUZZLE PHRASES!

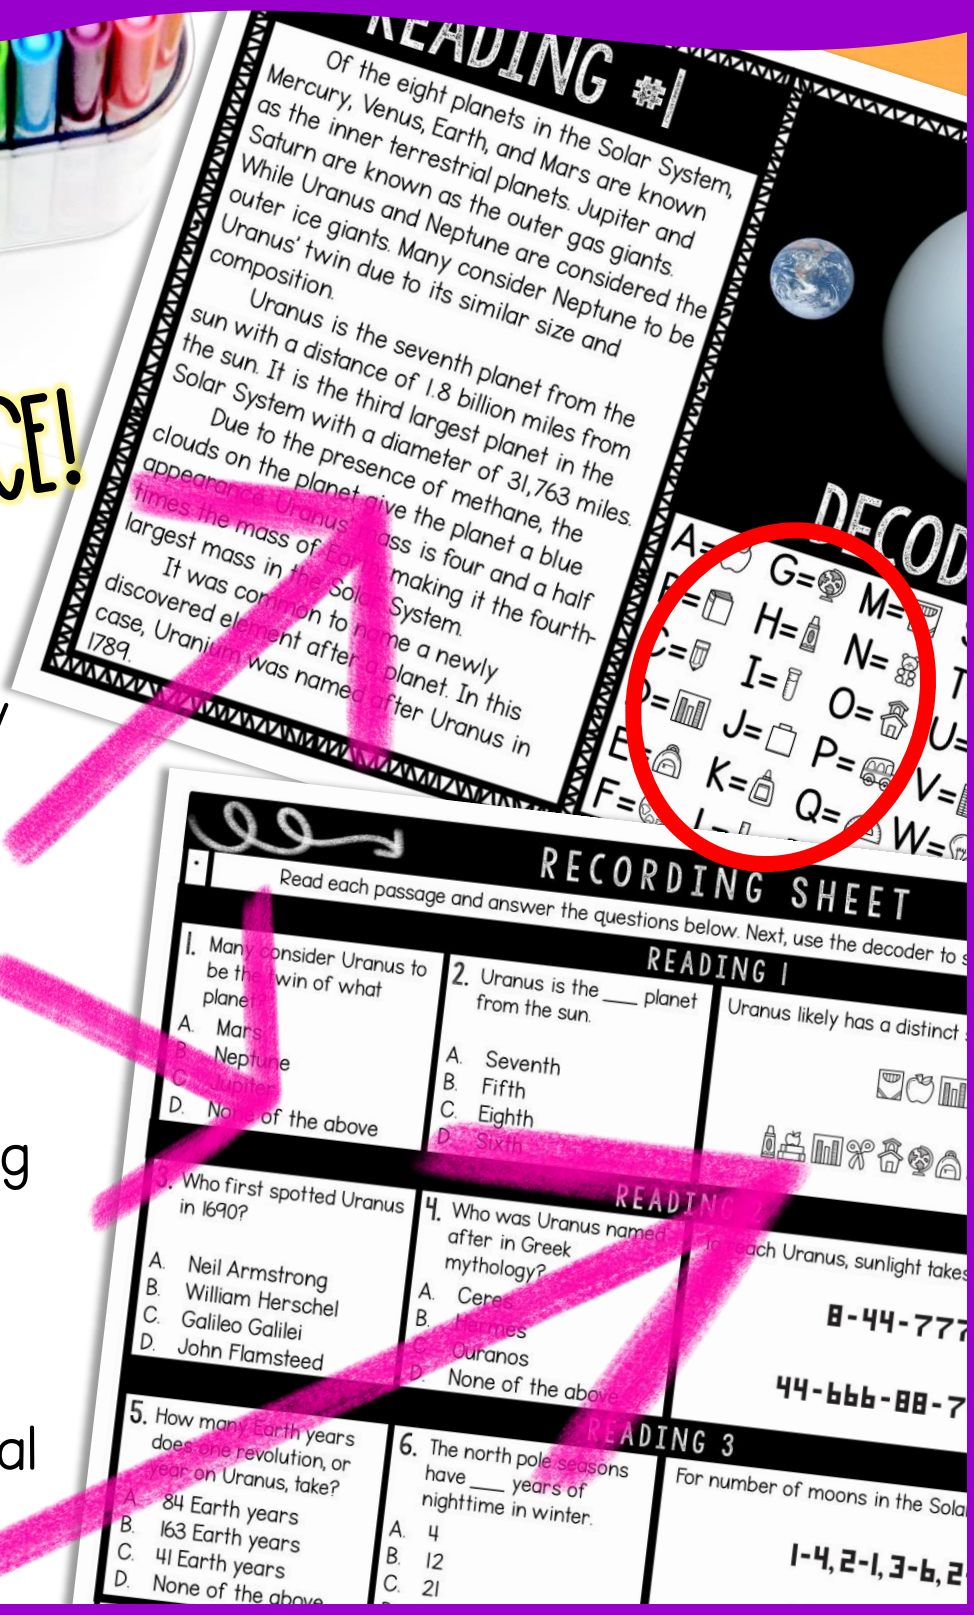

NO PREP!

HOW IT WORKS

ENGAGING READING COMPREHENSION PRACTICE!

1. Students work individually (or in pairs) and visit SIX reading stations.

2. Students will answer the questions related to that passage on their recording sheet.

3. Students will use that specific "decoder" to reveal a "clue" about the topic.

BENEFITS & USE

THINK OUTSIDE THE BOX!

- ANTICIPATORY SETS
- UNIT REVIEW
- EARLY FINISHERS
- STATIONS
- SUB PLANS
- PARTNER WORK
- ENRICHMENT
- NO PREP
- PRINT AND GO
- CROSS-CURRICULAR
- HIGHLY ENGAGING
