3

Civil cases involve disputes between people, businesses, or the government. They often deal with money, contracts, property, or personal injury. Civil cases, or non-criminal cases, may also include laws of tort (injured on someone else's property), family laws such as custody or divorce, and employment (job) laws.

7

The person initiating the lawsuit is known as the plaintiff. The plaintiff, or victim, in a civil case usually sues for monetary "damages." The defendant is the person or party whom the lawsuit has been filed against. The defendant must be formally notified of the lawsuit to ensure they have an opportunity to respond. This is done through "service of process," a legal procedure that officially informs the defendant that they are being sued.

HOW IT WORKS

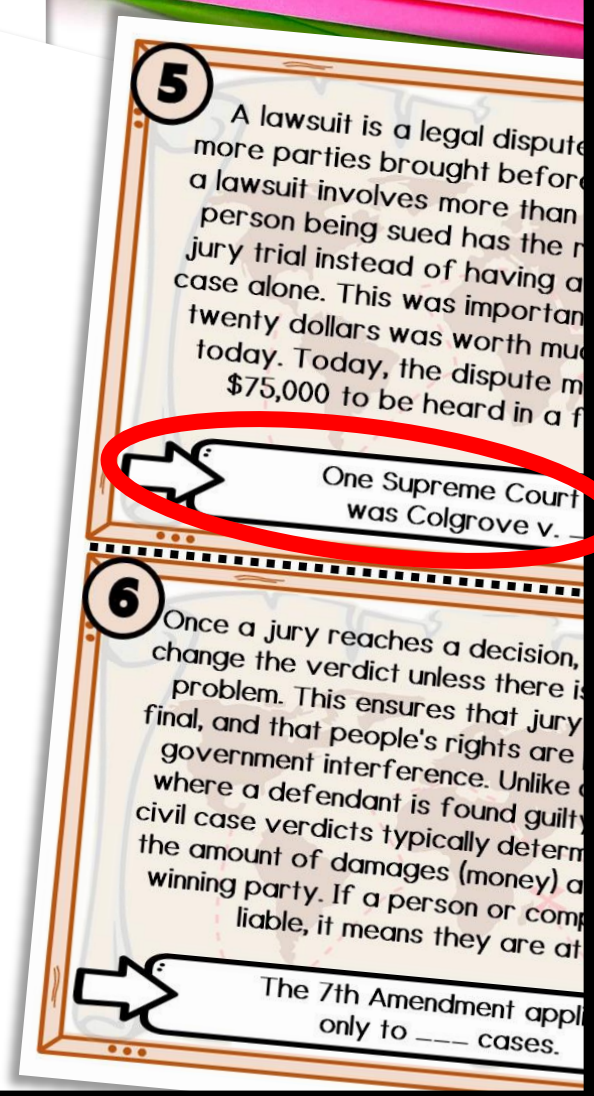

ENGAGING READING COMPREHENSION PRACTICE!

1. Students work individually (or in pairs) and visit 10 reading cards scattered around the room.

2. Students read the passage and look at the question at the bottom labeled "code word".

3. The code word for THAT card number will lead them to a different card. But here's the catch... students will NOT know where to find the code word answer so they will have to skim, browse and revisit the reading cards several times to find the answer they are seeking.
